

# How to Use Online Navigation Connected Services on Toyota Touch 2 - Guide

# Before you use online navigation connected services

1. For all online navigation connected services, the first step is to ensure that your car has internet access.

One method of connecting is using Bluetooth tethering.

Please refer to “How to enable Bluetooth tethering”.

2. Ensure that you have activated online navigation connected services, by entering your MyToyota app / credentials into the multimedia system.

Please refer to “How to activate online navigation connected services”.
